### A SUNSCREEN THAT'S GOOD TO YOUR SKIN

# 11 JUN A SUNSCREEN THAT'S GOOD TO YOUR SKIN

Posted at 22:47h in Skin by Melissa Altamirano • 0 Comments • 2 Likes

Trade your synthetic sunscreen for a mineral sunscreen that protects your skin

With the hottest summer months up ahead, it's important to keep your skin well protected from harsh rays to from the sun is the number one way to prevent sun spots, age spots, and all the signs of aging. But before your and consider what makes a good sunscreen. Then, ask yourself, "What if there was a sunscreen that provided skin?"

If you're looking at SPF (Sun Protection Factor) levels alone to make your decision, you may not be making the radiation (rays that burn), so it's important to look closely and find a product that protects against both UVB a

contribute to extrinsic aging, and nobody wants that!

*Mineral Perfection*, a cutting-edge SPF 30 sunscreen seeks to solve these problems in one perfectly formula the conventional chemical formula in many synthetic sunscreens. The active ingredients are zinc oxide and t tea and jojoba oil. This means less of a chance of irritation, even for sensitive skin types, since the product fo that can cause reactions. This unique formulation does not require preservatives, which can be another cont

Our light, non greasy tinted sunscreen also provides a sheer layer of color that goes on perfectly smooth and Fitzpatrick skin types). The combined sun protection and tint make it our favorite new skin care essential!

*Mineral Perfection* is safe for everyday use, post-peel procedures and is gentle enough to be used every day sufferers. Don't forget to apply it generously to face, neck and chest, or any exposed areas during sun expos reliable protection during your outdoor summer activities, and a tint that evens out minor skin imperfections find more product details and a list of ingredients here.

Now make sure to pair your *Mineral Perfection* with other protective measures such as proper clothing, a hat skin!
